## **DETAILED ACTION**

### ***Election/Restriction***

The following restriction requirement was inadvertently omitted from the last Office Action. The Examiner regrets any inconvenience caused applicant.

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-8 , drawn to organometallics, classified in class 556, subclass 1+.
  - II. Claims 9-21, drawn to immunoassay methods, classified in class 435, subclass 1+.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product can be used to modify silicones.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Art Unit: 1621

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
